

Mapping Your Schoolyard – Edison

Name: _____ Date: _____

Include on your map:

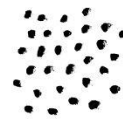

- Symbols from the Key including flow of water, surfaces, and storm drains.
- Partially pervious surfaces can be shown with fewer dots.
- Label locations of litter, pollution and places where puddles form.
- Sketch any specific **stormwater problems** you see or are aware of.
- Show larger plants and bushes.

Map Key

Direction of water flow

Pervious surface

Impervious surface

Storm drain

Add your own symbol here!

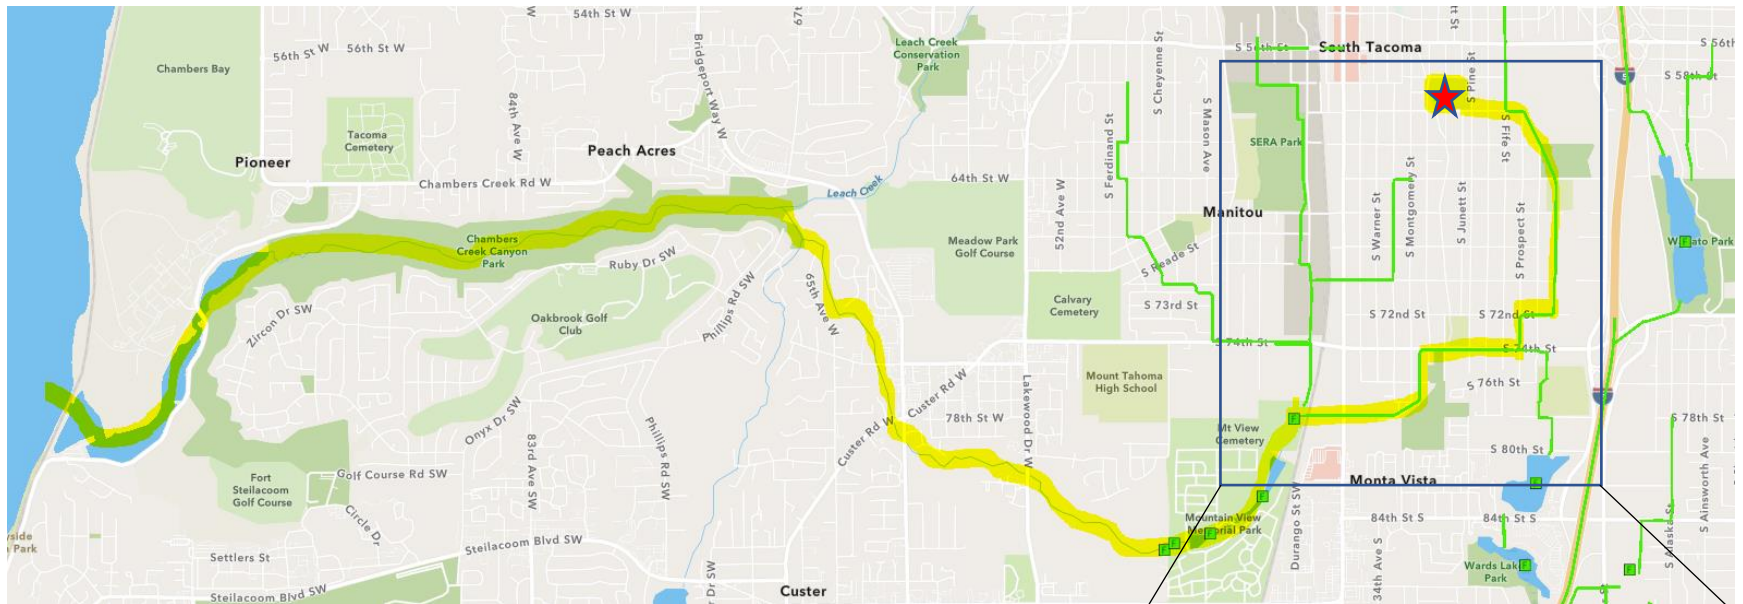

Edison Elementary - Where does your school's stormwater go? Follow the lines and arrows!

Arrows show the direction water travels, lines show the pipes underground.

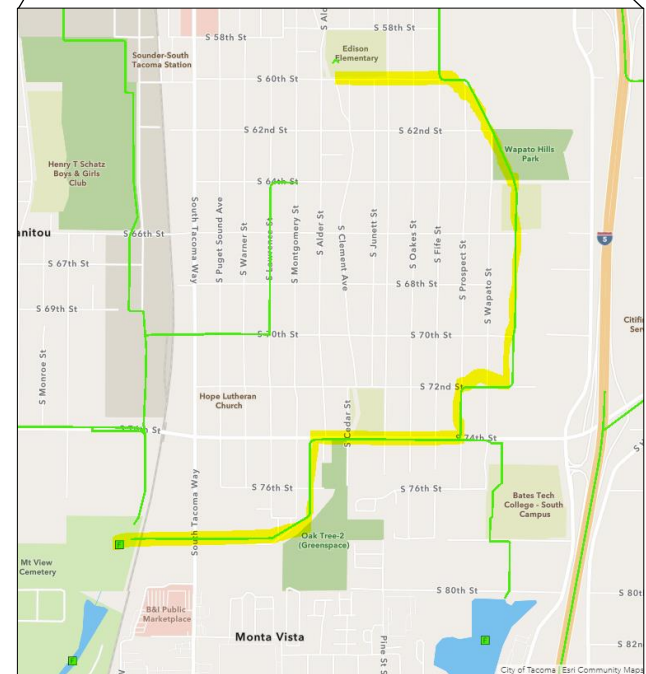

More on next page....

Now follow the yellow line away from your school (find your school by looking for the star) to see how it gets to the Salish Sea!

What places does the water travel to before it gets to the Salish Sea (blue water on the left)?

How does the stormwater from your school and neighborhood get to the Pacific Ocean?
